

# design your own scale

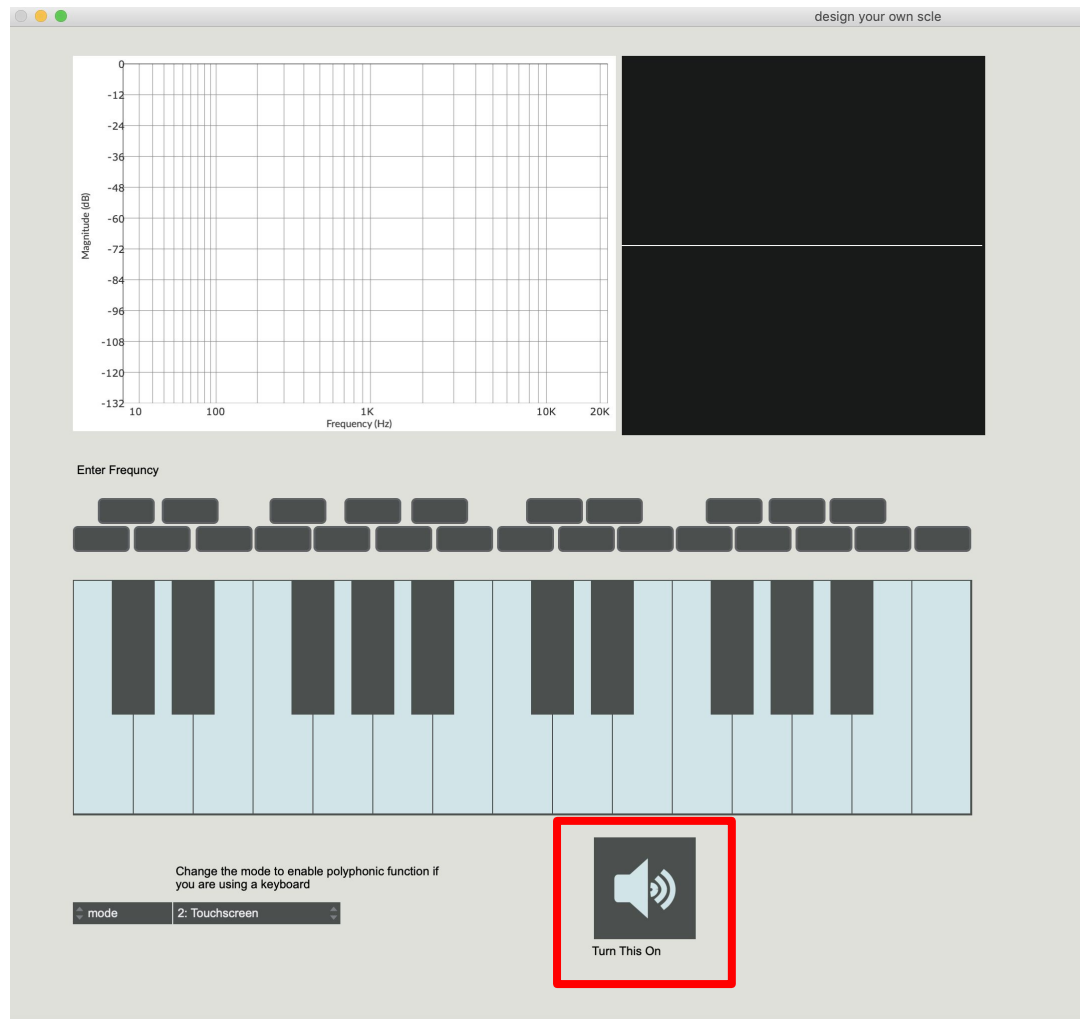

Instruction

# The default interface

The program has 4 parts.

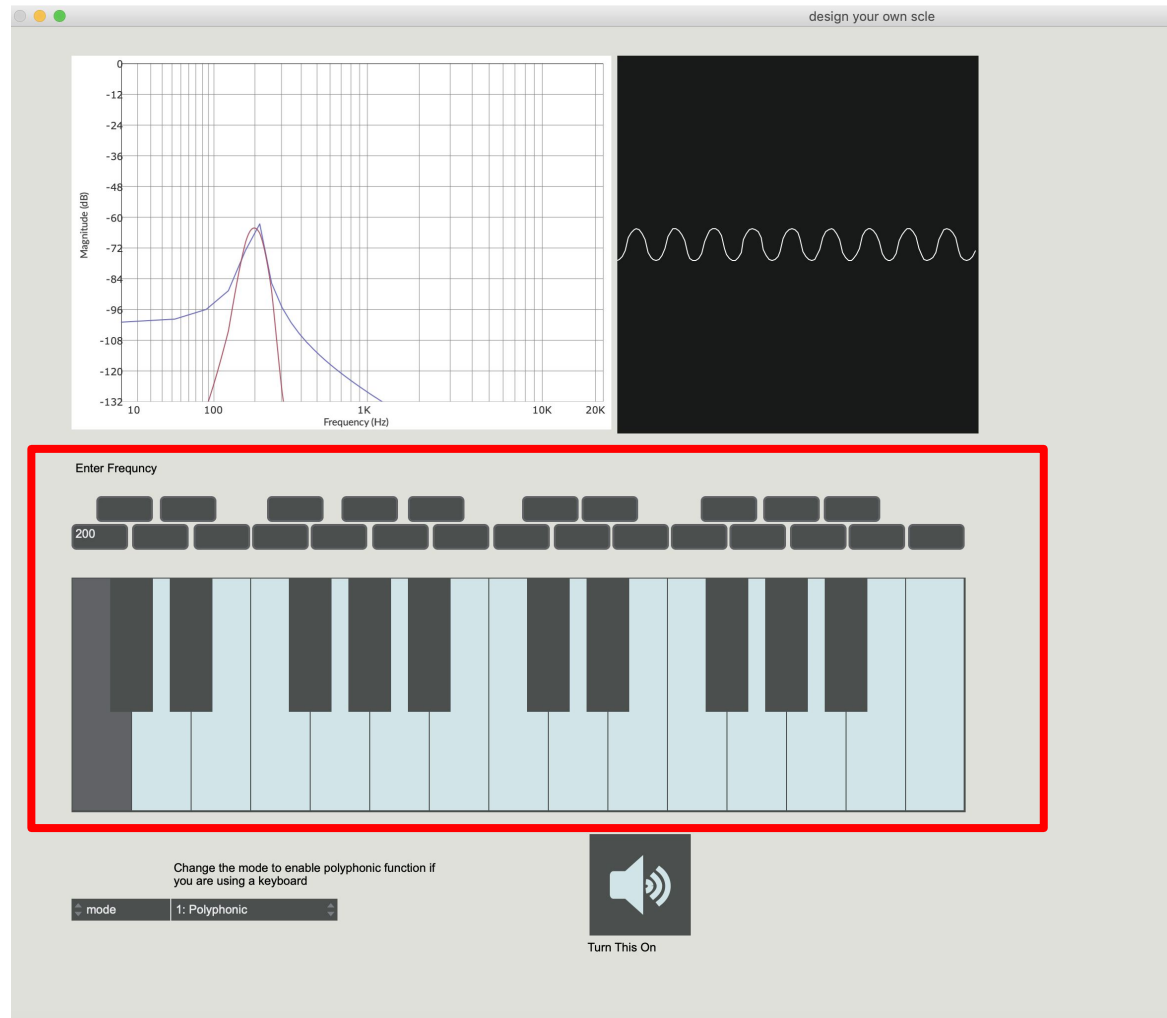

1: (bottom right) The speaker icon.  
This should be turned on in order to  
hear the sound.

2: (middle) the keyboard and the grey blocks.

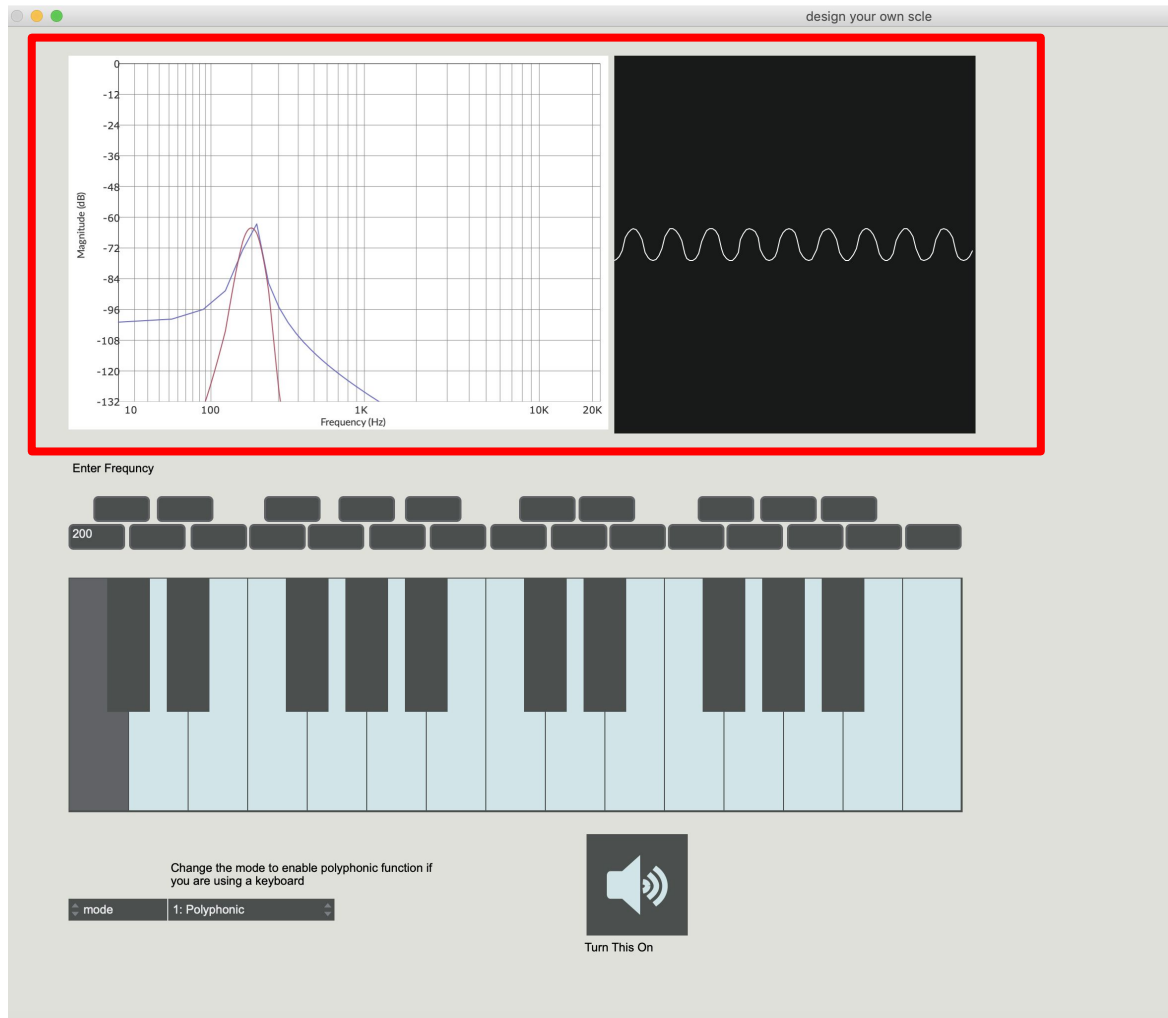

Enter the frequency in the blocks. The number controls the frequency of the corresponding keys. Then, click the keys to make the sound.

3: (top) The spectrum.

The left one is spectrogram.

The right is oscilloscope.

4: (bottom) choose between 3 modes of the keyboard.

1, monophonic, one note at a time.

2, polyphonic, it allows multiple notes at a time.

3: touchscreen, just like touchscreen.
